Specification

The abstract of the disclosure is objected to because the unparenthesized reference numeral "10" in lines 1 and 4 is improper. Correction is required. See MPEP § 608.01(b).

Claim Objections

Claim 7 is objected to because of the following informalities: In claim 7, line 4, "obtaining second material" is ungrammatical. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1 and 7, a second material is defined prior to a first material. The first defined material should be the "first material", while the second defined material should be the "second material".

Claims 1-6 and 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter

Art Unit: 3629

which applicant regards as the invention. In claim 1, line 6, "said material" is indefinite, as various materials are defined. Accordingly, the employment of "material" is indefinite, as several components of the claims can be identified by the term "material".

In claim 13, line 14, "said identification" lacks clear antecedent basis, as "identifying the presence..." in line 11 fails to distinguish a particular identification.

In claim 14, line 1, "said constituent" lacks basis for a single constituent.

Allowable Subject Matter

Claims 13-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Friedman discloses testing the hardness of a material. Abbate et al. discloses testing the hardness of a material. Brown et al. disclose comparing an unknown material to another known material employing a database of information relative to the known material. Kurtz et al. disclose comparing an unknown material to another known material to determine the acceptability of the unknown material for a use in the manner of the known material.
